

Steps to input your cube:

1. Click one color on the color board.
2. Click one block of the cube to put on the color.

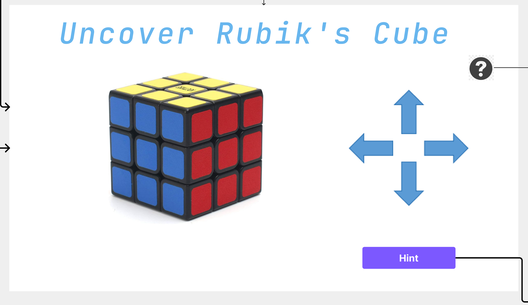
Can choose colors according to the user's rubix cube

Check of rules:
1.Number of Colors
2.The cube is solvable or not.

If it's feasible, link the page to "game page"

Note:
3D Movable : rotate the cube by moving the mouse while clicking

Note: if the user puts the mouse on this button, we will display following window.



How to play

Step 1: click one side of a block to choose it

Step 2: click up, down, left or right button to rotate

Note: if the user successfully unsolve the cube, the following window comes out automatically.

Congratulation! You finish the game!

Note: if the user clicks "Hint" button, we will rotate one side of cube to show the solution. The user can click it for several times to see next several steps.
